Subject Index for
Electronics and Communications in Japan, Part 1, Vol. 76, 1993

Absorbing boundary condition: **2**, 61-72
Abstraction: **1**, 34-44
Activity: **11**, 59-71
Adaptive antennas: **7**, 110-119
Adaptive array: **11**, 95-104
Adaptive array antenna: **5**, 101-111
Adaptive carrier tracking: **8**, 84-95
Adaptive control: **3**, 31-40; **10**, 26-38
Adaptive digital filter: **9**, 104-112
Adaptive equalizer: **9**, 67-78
Adaptive filter: **11**, 105-114
Address checker: **8**, 50-59
AGC singing protection control: **11**, 36-47
Air conditioning system for telcoms: **12**, 1-13
Airborne collision avoidance system: **6**, 101-110
ALOHA: **8**, 74-83
ALOHA systems: **7**, 89-99
Amplitude modulated vestigial sideband (AM-VSB): **5**, 1-11
Antenna: **7**, 81-88; **9**, 79-88
Antenna for broadcasting satellite: **4**, 70-80
Antenna measurements: **4**, 59-69
Aperture mapping: **9**, 79-88
Arbiter: **8**, 50-59
ARQ: **6**, 25-35
Array antenna: **8**, 96-108
Asynchronous transfer mode network: **4**, 24-34
ATM: **3**, 16-30; **4**, 35-46; **5**, 33-42
ATM cell: **12**, 14-28
ATM cells: **4**, 24-34
ATM networks: **8**, 37-49
ATM switch: **7**, 35-41
ATM Virtual path: **8**, 14-24
Automatic gain control: **11**, 36-47
Automatic program conversion: **5**, 43-53
Availability: **3**, 42-54

B-ISDN: **3**, 66-74; **5**, 33-42; **7**, 35-41
B-ISDN service control: **1**, 24-33
BCMP-type queuing network: **10**, 49-58
Beamtilt: **12**, 93-102
Beat noise limitations: **6**, 77-84
Bit error: **3**, 16-30
Bit error rate: **2**, 19-29
Bit flexible transmission: **6**, 57-76
Broadband: **4**, 102-111
Broadband integrated services digital network: **4**, 24-34
Broadcast communication: **7**, 35-41
Buffer overflow: **3**, 16-30; **12**, 14-28
Buffer read-out control: **12**, 14-28
Buffer underflow: **12**, 14-28
Burstiness: **11**, 11-22
Bursty nature: **8**, 37-49
Butler matrix: **6**, 101-110

Cable television (CATV): **5**, 1-11
Call blocking probability: **7**, 18-34
Call model: **1**, 24-33
Cancellation availability: **1**, 104-112
Capture effect: **7**, 89-99
Carrier recovery: **11**, 48-58
Cell distribution-type switching network: **5**, 12-22
Cell loss: **3**, 16-30; **4**, 35-46
Chorus (rising tone chorus): **2**, 73-86
Circuit-switched networks: **7**, 18-34
Circular array: **6**, 101-110
Circular polarization: **6**, 92-100; **7**, 81-88
Circularly polarized antenna: **7**, 100-109
Clock phase estimation burst demodulator: **7**, 70-80
Clock recovery: **7**, 70-80
CMI code: **4**, 13-23
CNR: **11**, 80-94
Co-channel interference: **9**, 89-103
Cochannel interface: **5**, 101-111
Coded modulation: **5**, 54-67
Coding gain: **8**, 60-73
Coherent detection: **1**, 63-73
Coil-loading: **1**, 74-83
Collision control: **7**, 1-9
Common channel signaling networks: **1**, 45-62
Communication network control: **12**, 41-51
Communication protocol: **3**, 55-65
Communication service specification: **3**, 1-15
Communication software: **5**, 43-53
Communication status discrimination: **4**, 13-23
Compatibility: **4**, 1-12
Complex envelope: **12**, 52-63
Computer-supported coordination: **1**, 11-23
Concatenated codes: **6**, 25-35

Conformal antenna: **12**, 73-81
Conformal grids FD-TD method: **12**, 73-81
Conformance testing: **2**, 1-18
Congestion control: **1**, 45-62
Connection admission control: **5**, 12-22
Connection pattern: **1**, 34-44
Connection point: **1**, 24-33
Connection-oriented LLC protocol: **6**, 12-24
Contoured-beam antenna: **4**, 70-80
Control delay: **1**, 45-62
Controlled capacity system: **3**, 84-92
Convergence characteristics: **7**, 110-119
Conversion efficiency: **5**, 1-11
Corner angle: **12**, 64-72
Corner length: **12**, 64-72
Corner reflector antenna: **12**, 64-72
Correcting: **7**, 1-9
Correlation coefficient: **9**, 55-66; **10**, 80-90
Covariance ellipse: **1**, 95-103
Curved structure: **12**, 73-81
Cylindrical cavity resonator: **6**, 85-91

Data link layer: **6**, 12-24
Data link protocol: **10**, 49-58
Data traffic: **8**, 37-49
Data transmissions over a distribution line: **9**, 104-112
Database: **9**, 21-33
Delay profile: **3**, 93-104
Delay spread: **3**, 93-104
Delay variation: **12**, 14-28
Delta-gap generator: **7**, 100-109
Demand access: **8**, 25-36
Demodulator: **8**, 84-95
Demultiplexing collided packets: **7**, 1-9
Detector diversity: **1**, 63-73
Differential detection: **1**, 63-73
Differentially encoded GMSK: **2**, 87-97
Diffraction effect: **3**, 105-110
Digital cross connect system (DCS): **1**, 1-10
Digital filter: **5**, 101-111
Digital mobile communication: **8**, 84-95
Digital modulation: **12**, 52-63
Digital modulation scheme: **10**, 68-79
Digital radio system: **11**, 95-104
Digital signal processing: **2**, 98-107
Dipole antenna: **9**, 55-66
Direction measurement: **6**, 101-110
Direction-finding measurements: **2**, 73-86
Directional filter: **6**, 85-91
Discrete cosine transform (DCT): **6**, 1-11
Disrupted EDFA: **3**, 75-83
Distributed office automation (OA) environment: **1**, 11-23
Distributed optical amplifiers: **8**, 1-13
Diversity: **8**, 84-95; **10**, 80-90
Diversity reception: **11**, 80-94
Diversity synthesis: **9**, 104-112
DPSK system: **2**, 19-29
DSP: **9**, 104-112
Dual frequency: **4**, 102-111; **12**, 64-72
Dual-reflector antenna: **4**, 70-80
Dual-ring LAN: **3**, 42-54
Duct: **5**, 67-78

Echo: **2**, 19-29
Echo canceller: **11**, 36-47
EDFA: **3**, 75-83
Effective frequency utilization: **1**, 84-94
Effective optical modulation index: **12**, 29-40
Electromagnetic energy flux density: **7**, 100-109
Electromagnetic interference: **10**, 105-113
Electromagnetic particle code: **2**, 50-60
Electromagnetic pulse: **10**, 105-113
Electromagnetic satellite disturbance: **2**, 50-60
Electrostatic discharge: **10**, 105-113
Er-doped fiber: **6**, 36-45
Er-doped fiber amplifiers: **6**, 36-45
Er-doped optical filter: **6**, 77-84
Erbium-doped fiber amplifier: **6**, 57-76
Error correcting codes: **7**, 1-9
Error correction: **3**, 16-30
Error distribution: **1**, 95-103
Error rate performance: **5**, 54-67
Error recovery: **10**, 49-58
Estimation accuracy: **8**, 96-108
External modulator: **6**, 57-76
Extinction ratio: **3**, 105-110

Fading: **7**, 89-99
Fading diversity: **3**, 84-92
FD-TD method: **2**, 61-72; **12**, 73-81
Feature interaction: **1**, 24-33
FEC: **6**, 25-35
Fiber local injection and detection: **7**, 42-53
Fiber transfer splicing: **7**, 42-53
Fluid model: **1**, 45-62
FM multiplex broadcasting: **10**, 68-79
Formal technique: **2**, 1-18
Forward error correction: **11**, 48-58
Fourier transform: **7**, 54-62

Frame memory refreshing: **4**, 35-46
Frequency correlation: **3**, 93-104
Frequency selective fading: **2**, 87-97; **9**, 67-78
Frequency synthesizer: **9**, 44-54
Frequency utilization rate: **9**, 89-103
Fuzzy control: **12**, 41-51

Generation mechanism: **2**, 73-86
Geometrical optics: **9**, 79-88
Global positioning system: **1**, 95-103
Go-back-n retransmission: **10**, 49-58
Godlove's color difference: **9**, 9-20
Gram-Schmidt: **11**, 105-114
Grating lobes: **4**, 59-69

Half-bit offset decision: **2**, 87-97
HDLC: **10**, 49-58
HDTV: **4**, 1-12
Heat density: **12**, 1-13
Hi-Vision: **4**, 47-58
Hi-vision receiver: **6**, 46-56
High efficiency microstrip antenna: **12**, 93-102
High frequency switching: **9**, 34-43
High speed ring network: **10**, 12-25
High vision: **8**, 25-36
High-frequency switching converters: **2**, 30-39
High-speed frequency switching: **9**, 44-54
High-speed LANs: **5**, 33-42
High-speed packet network: **3**, 66-74
High-speed transmission: **6**, 57-76
Holography: **8**, 109-17

IEEE 802.5: **3**, 42-54
Image coding: **6**, 1-11
Image transmission: **3**, 66-74
Imaging: **12**, 103-111
Imaging array: **4**, 81-90
Impulsive radio noise: **5**, 88-100
IN architecture: **1**, 24-33
IN conceptual model: **1**, 24-33
In-band power minimizing method: **1**, 84-94
Indirect ESD: **10**, 105-113
Input traffic policing control: **11**, 11-22
Intelligent antennas: **7**, 110-119
Intelligent message communication system: **1**, 11-23
Intelligent network: **1**, 34-44
Intelligent network (IN): **1**, 24-33
Interface cancellation: **1**, 84-94
Interference cancellation: **1**, 104-112; **11**, 80-94
Interfield signal processing: **10**, 39-48
Interframe coding: **4**, 35-46
Intermodulation distortion: **8**, 25-36; **12**, 29-40
Internally nonblocking switching network: **9**, 1-9
Iris-loaded cross-coupler: **6**, 85-91
Irreversible coding: **6**, 1-11

Jitter: **5**, 23-32
Joint photographic experts group (JPEG): **6**, 1-11

Kalman filter: **9**, 67-78

L-MSK: **10**, 68-79
Labeled transition system with variables: **2**, 1-18
LAN architecture: **5**, 33-42
Land mobile communication: **5**, 54-67
Lapped transforms: **4**, 1-12
Large deployable antennas: **4**, 59-69
Layered protocol: **6**, 12-24
Leaky-bucket method: **11**, 11-22
Learning: **12**, 41-51
Least-squares method: **11**, 80-94
Leg: **1**, 24-33
Line in communication state: **4**, 13-23
Loss compensation: **3**, 75-83
LOTOS: **2**, 1-18

MAC protocols: **10**, 12-25
Management network base: **9**, 21-33
Masking effect of noise: **11**, 59-71
Matrix switch: **6**, 36-45
Maximum likelihood sequence estimation: **9**, 67-78
Mean arrival rate: **11**, 11-22
Mean effective gain: **9**, 55-66
Membership function: **12**, 41-51
Message sequence chart: **3**, 1-15
Microstrip antenna: **2**, 40-49; **4**, 102-111; **12**, 73-81
Microwaves: **8**, 109-17
Millimeter wave: **12**, 103-111
Millimeter waves: **4**, 81-90
Mirror symmetrical cross section: **4**, 91-101
Mobile communication: **1**, 63-73; **9**, 55-66, 67-78; **10**, 91-104
Mobile communications wireless equipment: **9**, 44-54
Mobile packet radio networks: **11**, 1-10
Mobile radio: **12**, 52-63
Mobile reception: **10**, 68-79
Modulator: **2**, 98-107
Moment method: **7**, 54-62; **10**, 80-90
MOSFET: **7**, 10-17
Motion compensation: **8**, 60-73

Motion detection: **4**, 47-58
Motion detection disagreement: **4**, 47-58
Moving area detection: **6**, 46-56
Moving picture coding: **8**, 60-73
Multibeam: **6**, 101-110
Multibeam antenna: **6**, 85-91
Multibeam satellite communication system: **5**, 79-87
Multicast connection: **5**, 12-22
Multiconnection: **1**, 24-33
Multilevel modulation: **2**, 98-107; **3**, 84-92
Multimedia backbone LAN (MBLAN): **5**, 33-42
Multimedia mail system: **1**, 11-23
Multiparty: **1**, 24-33
Multipath: **11**, 1-10
Multipath fading: **8**, 96-108
Multipath propagation: **1**, 104-112
Multipulse: **10**, 26-38
Multistage connection network: **7**, 35-41
MULTISTAR LAN: **8**, 50-59
Multisubsample signal processing: **10**, 39-48
Multivariable analysis: **10**, 91-104
Munsell color space: **9**, 9-20
MUSE: **4**, 47-58; **6**, 46-56; **10**, 39-48
Mutual antenna coupling: **6**, 101-110

Network control: **8**, 14-24
Network node interface: **5**, 23-32
Network services: **3**, 1-15
Networking performance evaluation: **10**, 12-25
Neural network: **3**, 31-40
Noise figure: **3**, 75-83; **5**, 1-11; **6**, 77-84
Noise optical fiber amplifier: **8**, 1-13
Non-realtime message communication: **1**, 11-23
Non-regenerative repeating: **11**, 72-79
Nonblocking ATM switching network: **5**, 12-22
Nonducted propagation: **2**, 73-86; **7**, 63-69
Nonuniformity: **5**, 67-78
Numerical analysis: **1**, 74-83
Numerical experiment: **2**, 50-60

Optical amplifier: **6**, 57-76
Optical amplifiers: **8**, 1-13
Optical beam shaping spatial filters: **3**, 105-110
Optical CATV: **8**, 25-36
Optical communication theory: **10**, 59-67
Optical communications: **2**, 19-29
Optical fiber: **4**, 13-23
Optical fiber amplifier: **5**, 1-11
Optical fiber identification: **7**, 42-53
Optical filter: **6**, 77-84
Optical preamplifier: **6**, 77-84
Optical pulse modulation: **10**, 59-67
Optical sampling: **10**, 1-11
Optical switch: **6**, 36-45
Optimization: **8**, 14-24
Optimization algorithms: **7**, 110-119
Optimum quantization: **11**, 59-71
Optimum receiver: **5**, 88-100
Orthogonal transform: **8**, 60-73
Orthogonal transforms: **4**, 1-12
OSI systems management: **9**, 21-33
Output power detection: **1**, 84-94
Overload traffic: **7**, 18-34

Packet communication: **8**, 74-83
Packet delay: **8**, 37-49
Packet exchange: **7**, 1-9
Packet loss rate: **8**, 37-49
Packet radio communications systems: **7**, 89-99
Packet video transmission: **3**, 66-74
Parallel pipeline processing: **11**, 95-104
Parallel plate mode: **2**, 40-49
Parasitic diode: **7**, 10-17
Parasitic element: **12**, 64-72
Performance analysis: **10**, 49-58
Performance evaluation: **3**, 55-65
Performance evaluations: **8**, 37-49
Permittivity: **8**, 109-17
Personalized secretary system: **1**, 11-23
Phase ambiguity: **11**, 48-58
Phase control: **6**, 92-100
Phase diversity: **9**, 104-112
Phase shifter: **6**, 92-100
Phase-locked loop: **9**, 44-54
Phased array: **6**, 101-110
Phased array antenna: **6**, 92-100
Photon communication process: **10**, 59-67
Pitch prediction: **10**, 26-38
Planar antenna: **7**, 81-88; **12**, 93-102
Plasma diagnostics: **12**, 103-111
Plasma measurement: **4**, 81-90
Pocklington's integral equation: **1**, 74-83
Point matching method: **4**, 91-101
Pointer processor: **5**, 23-32
Polarization: **12**, 82-92
Portable telephone: **10**, 80-90
Positive/negative justification: **5**, 23-32
Post-detection selection diversity: **2**, 87-97
Power loss distribution: **2**, 61-72
Power supplies: **2**, 30-39

Predictive (en)coding: **3**, 31-40
Propagation: **5**, 67-78
Propagation mechanism: **2**, 73-86
Propagation model: **10**, 91-104

QPSK: **8**, 84-95
Quadrature amplitude modulation: **5**, 54-67
Quantization cube: **11**, 59-71
Quantum entropy: **10**, 59-67
Quantum mechanical channel: **10**, 59-67

Radar: **8**, 109-17
Radial line: **12**, 93-102
Radial line slot antenna: **7**, 81-88
Radiation characteristics: **4**, 59-69
Radiation pattern: **5**, 101-111
Radio communication: **1**, 104-112; **3**, 84-92; **11**, 80-94
Radio propagation: **10**, 91-104
Radio relay system: **2**, 98-107
Random access: **8**, 74-83
RAS: **3**, 42-54
Rate-distortion characteristic: **3**, 31-40
Ray tracing: **7**, 63-69
Rearrangement control algorithm: **1**, 1-10
Received signal level correlations: **9**, 89-103
Receiving level correlation: **3**, 93-104
Reconfiguration control: **11**, 23-35
Reconfiguration mechanism: **3**, 42-54
Reduced form: **2**, 1-18
Redundant system: **6**, 101-110
Reference signal: **8**, 96-108
Reflector antenna: **9**, 79-88
Reflector errors: **4**, 59-69
Region segmentation: **9**, 9-20
Region segmentation coding: **9**, 9-20
Reliability: **3**, 42-54; **6**, 101-110; **12**, 1-13
Reservation mechanism: **3**, 55-65
Resistively loaded dipole: **7**, 54-62
Ring LAN: **11**, 23-35

S-IPAC: **11**, 72-79
S/N ratio: **10**, 1-11
Same beamwidth: **12**, 64-72
Satellite broadcasting: **7**, 81-88
Satellite communication: **8**, 74-83
Satellite communications: **1**, 84-94
Satellite packet communication network: **6**, 12-24
SDH signal: **12**, 14-28
Selective repeat types: **6**, 25-35
Self interference passing adjacent channels: **11**, 72-79
Service control: **1**, 34-44
Service control interface: **1**, 34-44
Serviceability: **3**, 42-54
Shadowing: **11**, 1-10
Shaped reflector antenna: **4**, 70-80
Sidelobe canceller: **11**, 105-114
Signal processing for moving areas: **10**, 39-48
Slot coupled antenna: **2**, 40-49
Slotted ALOHA: **8**, 74-83
Slotted Aloha: **11**, 1-10
Small antenna: **10**, 80-90
Small earth station: **1**, 84-94
Small-zone mobile communications systems: **9**, 89-103
Snow: **8**, 109-17
Software productivity: **5**, 43-53
Sol air temperature: **12**, 1-13
Space diversity: **9**, 55-66
Space plasma: **2**, 50-60
Spatial filtering: **5**, 101-111
Spatial frequency: **8**, 96-108
Spatial network method: **2**, 40-49
Specification description language: **5**, 43-53
Speech codec: **10**, 26-38
Spontaneous emission: **8**, 1-13
Spread spectrum multiple access: **5**, 101-111
Spread spectrum processing gain: **5**, 101-111
SS-TDMA: **5**, 79-87
Star LAN configuration: **8**, 50-59
Star-ring topology: **11**, 23-35
Statistical multiplexing: **4**, 24-34
Subsurface radar: **7**, 54-62
Sum frequency generation: **10**, 1-11
Suppression method: **2**, 40-49
Surge suppression: **2**, 30-39
Switched snubber: **2**, 30-39
Switched snubber circuit: **9**, 34-43
Switching characteristics: **7**, 10-17
Switching circuit analysis: **9**, 34-43
Synchronization control scheme: **5**, 79-87
Synchronized digital network: **1**, 1-10
Synchronous digital hierarchy: **5**, 23-32
Synchronous rectifier: **7**, 10-17
Synthesis filter coefficients: **10**, 26-38
Systolic array: **11**, 95-104

TDMA satellite communication: **7**, 70-80
TDMA-Reservation communication network: **6**, 12-24
Temporal filtering: **5**, 101-111

Test sequence generation: **2**, 1-18
Thickness control: **3**, 105-110
Three-dimensional ray tracing: **2**, 73-86
Threshold value: **12**, 29-40
Throughput: **7**, 18-34, 89-99
Time resolution: **10**, 1-11
Time-varying channel: **11**, 1-10
Token ring: **3**, 42-54
Token ring network: **10**, 12-25
Traffic control: **8**, 14-24
Traffic information: **10**, 68-79
Traffic theory: **1**, 45-62; **7**, 18-34
Transformer: **4**, 102-111
Transient response: **7**, 54-62
Transmission network operations: **9**, 21-33
Transmission power control: **9**, 89-103
Transmitter power amplification: **12**, 52-63
Transponder: **6**, 101-110
Transversal equalizer: **11**, 72-79
Tree-type algorithm: **3**, 55-65
Trellis-coded modulation: **5**, 88-100; **11**, 48-58; **12**, 52-63
Troposphere: **5**, 67-78
TST switches: **1**, 1-10
Tuning: **12**, 41-51
Tweak atmospherics: **12**, 82-92
Two-wire amplifier: **11**, 36-47
Ultrashort optical pulse: **10**, 1-11
Unavailability: **12**, 1-13
Uniform chromaticity color space: **9**, 9-20
Usage efficiency: **5**, 79-87

Variable bit rate traffic: **5**, 12-22
Variable-capacity transmission: **2**, 98-107
Various block size: **3**, 31-40
Very low latitude: **7**, 63-69
Video coding: **4**, 1-12
Video detection: **4**, 81-90
Video traffic: **4**, 24-34
Virtualized resource: **1**, 34-44
VLF: **12**, 82-92

Wave: **5**, 67-78
Wave absorber: **4**, 91-101
Waveguide filter: **6**, 85-91
